

STREET COINS

WhitePaper

INTRODUCTION

Welcome to the Street Coins whitepaper, an exploration into the future of digital finance. As the digital economy continues to evolve, we present an innovative cryptocurrency project built on advanced blockchain technology. Street Coins aims to address the challenges of security, scalability, and governance in the existing financial landscape. With a focus on empowering individuals and businesses, Street Coins offers secure and transparent transactions while fostering community engagement through decentralized governance. This whitepaper provides a comprehensive overview of our project, outlining its objectives, technology, ecosystem, market analysis, technical specifications, and roadmap. Join us on this exciting journey as we revolutionize the way we transact and participate in the digital currency ecosystem. Together, we can shape a future of finance that is inclusive, efficient, and transformative.

1. ABSTRACT

THE STREET COINS PROJECT

The Street Coins project presents a groundbreaking cryptocurrency ecosystem designed to revolutionize the digital economy. Powered by advanced blockchain technology, Street Coins offers secure, fast, and transparent transactions. Our decentralized governance model ensures inclusivity and allows token holders to actively participate in decision-making processes. With a focus on scalability and versatility, Street Coins caters to various use cases such as e-commerce, peer-to-peer transactions, micropayments, and remittances. Join us on this transformative journey as we reshape the way people transact, invest, and engage with digital currency.

WHAT IS BURN?

The burning of tokens involves the permanent removal of existing cryptocurrency coins from circulation, thus controlling inflation. Our token takes it one step further and burns it automatically to bring confidence to the users and remove the one big question in any crypto group, which is when burn would occur. Thus, we put it as our number ONE priority

WHAT IS SO GREAT ABOUT BURNING?

VALUE

It is all about the supply and demand, and if there's the fewer coin in circulation for sale than it would increase the demand of the token thus driving it up in value. It also helps to stabilize the value and curb any potential of a price inflation.

LONG TERM COMMITMENT

Trust and confidence is the key to any project. By burning the coin automatically, it would provide more excellent price stability, which is essential for long time investors who is holding our token, thus showing our commitment for the long run.

2. VALUE

TRUST

We prioritize security and privacy, giving users peace of mind to confidently engage in financial transactions within our trusted ecosystem.

LONGEVITY

Built to last, our robust infrastructure and forward-thinking roadmap ensure the sustainable growth and continued success of Street Coins.

TRANSPARENCY

We prioritize openness, ensuring all transactions and decisions are visible and auditable, fostering trust and accountability.

COMMUNITY

Together, we thrive. Our inclusive community actively participates in governance, fostering collaboration, and collective ownership for a vibrant ecosystem.

3. STREET COINS

Street Coins Token (SCT) is the native cryptocurrency of the Street Coins ecosystem. Built on a secure and decentralized blockchain, SCT serves as the primary medium of exchange within the ecosystem, facilitating fast and cost-effective transactions. With a limited supply and built-in utility, SCT holders can participate in governance, earn rewards, and access exclusive features. Embracing the principles of transparency and inclusivity, Street Coins Token empowers individuals and businesses, driving the widespread adoption of digital currency in the evolving financial landscape

BINANCE SMART CHAIN (BSC) BENEFITS

- **Fast Transactions**

As mentioned earlier, Binance Smart Chain uses a Proof-of-Stake consensus algorithm and is able to achieve a block time of 3 seconds. This is four times faster than the Ethereum blockchain, which has a block time of 13 seconds.

- **Low Transaction Fees**

Ethereum network congestion and scalability issues have once again triggered skyrocketing gas fees. BEP-20 provides a significant relief there as the transaction costs are only a few cents.

- **Cross-chain compatibility**

Binance Chain and Binance Smart Chain are compatible chains. As a result, BEP-20 and BEP-2 tokens can be easily moved across both networks using a simple wallet.

- **Exchange listings**

BEP-20 token standard has become very popular. As a result, most of the leading exchanges easily list the BEP-20 tokens.

4. ECOSYSTEM

INSTANT REWARDS

Street Coins ecosystem provides instant rewards for active participants, incentivizing engagement and fostering a vibrant community.

Street Coins embraces a community-driven approach, empowering users to actively participate in governance and decision-making processes

COMMUNITY DRIVEN

LIQUIDITY

The Street Coins ecosystem ensures high liquidity, allowing users to seamlessly trade and exchange tokens with ease.

5. STREET COOINS PROTOCOL

BIG VISION, GREAT FEATURES

street coins is a simple meme token, but we'll burn all obstacles on our journey to the moon. Bear in mind street coins will become hotter along the way until nothing can stop us from our destination. The community holder of the street coins will get all the rewards along the journey.

REWARD HOLDING

4% of each buying and selling transaction is redistributed to all token holders automatically. That means holder will earn more Street Coins by just holding them in their wallet

LIQUIDITY POOL

STREET COINS collects 5% tax which then is stored inside the contract. It helps to create price stability and community trust.

TEAM LEAD, COMMUNITY DRIVEN

2% of each transaction will be credited to the marketing wallet. We set up a marketing wallet to ensure our capability to support the marketing team and expenses. It helps us grow faster with proper marketing strategies and supporting teams.

AUTO BURN

4% of each transaction will be sent to the dead wallet. Coins are burned with every buying and selling transaction. By reducing the overall number of tokens in circulation, these events make tokens scarcer and boost STREET COINS valuation, and providing greater incentives to holders.

6. ROADMAP

PHASE 2 – DEVELOPMENT

- Commence the development of the Street Coins blockchain infrastructure
- Conduct rigorous testing and security audits
- Launch the Street Coins testnet for community feedback and bug reporting
- Begin forming strategic partnerships with industry leaders

PHASE 4 – ECO SYSTEM EXPANSION

- Expand the Street Coins ecosystem by adding new use cases and partnerships
- Enhance the governance model, allowing token holders to actively participate in decision-making
- Foster community engagement through regular updates, meetups, and collaborations
- Continuously improve the Street Coins platform based on user feedback and market demands

PHASE 1 – FOUNDATION

- Establish the core team and finalize project vision
- Conduct thorough market research and competitor analysis
- Develop the Street Coins whitepaper and tokenomics model
- Launch the official Street Coins website and social media channels

PHASE 3 – TOKEN SALE AND LAUNCH

- Conduct a token sale event to raise funds for further development and ecosystem expansion
- List Street Coins (STC) on major cryptocurrency exchanges
- Release the Street Coins mainnet, ensuring a stable and scalable network
- Integrate Street Coins as a payment option with partner businesses
- Conduct a token sale event to raise funds for further development and ecosystem expansion
- List Street Coins (STC) on major cryptocurrency exchanges
- Release the Street Coins mainnet, ensuring a stable and scalable network
- Integrate Street Coins as a payment option with partner businesses

PHASE 5 – BLAST OFF

- Drive widespread adoption of Street Coins as a trusted and preferred digital currency
- Foster strategic alliances with global financial institutions and organizations
- Enable seamless cross-border transactions and remittances
- Empower individuals and businesses worldwide to leverage the benefits of decentralized finance
- Drive widespread adoption of Street Coins as a trusted and preferred digital currency
- Foster strategic alliances with global financial institutions and organizations
- Enable seamless cross-border transactions and remittances
- Empower individuals and businesses worldwide to leverage the benefits of decentralized finance

7. TOKENOMICS

The Street Coins tokenomics model is designed to create a sustainable and thriving ecosystem. With a limited token supply and a deflationary mechanism, token value is preserved. Token holders can participate in staking, yield farming, and governance, earning rewards and influencing the project's direction.

3% LIQUIDITY

Having a stable liquidity is very important for the the long term health of the token and so the biggest part of the tax will go towards that. This assures that every holder is able to get back their investment back on demand.

4% MARKETING

This is Street Coins' battle chest. Is how he can always get high.

2% BUYBACK

This is the contract helping the chart get as high as Street Coins

2% REFLECTION

For each transaction a percentage of the tax goes to the contract that then buys Ethereum to distribute among the holders.

THANK YOU!
